

WILSON DISEASE — A FAMILY STUDY

SADIG A/WAHAB, A. OMER, M.D. MUSTAFA,

A. SATIR & A.M. EL HASSAN,

Department of Pathology, Faculty of Medicine

SUMMARY :—

The family under consideration is of mixed Greek Origin. The index patient is a 17 year old twin female who was discovered to be suffering from Wilson Disease following the death of her older sister. The other twin sister also died of Wilsons Disease. The investigations, clinical course, treatment, and postmortem findings of these patients together with results of screening of the other members of the family are presented.
